

Walking The Highwire – New Modes Of Interaction Between Academic Design Research and Business Engagement In UK

Dr. Leon Cruickshank
ImaginationLancaster
Lancaster University, UK

Aim

Discuss tensions in UK Universities with the 'impact' agenda and describe 2 strategic responses to this we have developed.

Start to examine this through the lens of activity theory

Three Activities

Research – High status, more isolated researcher focus

Teaching – medium status, supporting research (in places) but also customer facing

Almost everywhere a separate team will be doing

Business engagement –(third mission/ outreach/ knowledge transfer/ knowledge exchange) working with companies, using low status ERDF (EU) structural funding – Client focused

IMPACT Required!

Research Assessment Exercise (and coming Research Excellence Exercise REF) use IMPACT of research as a strong component of of assessment.

Impact for some disciplines will be purely bibliometric (citation based) but this is not likely to be the case for design.

We will have to demonstrate research has an effect of the wider world. Working with industry will be an important part of this.

UK University Types

Ancient	Red Brick	Plate Glass	New
Cautious Collaborators	Cautious Collaborators	Imaginative	Entrepreneurial

UK University Types

Ancient	Red Brick	Plate Glass	New
1100 – 1600	1837-1901	1960s	1980s
Prestigious	Victorian	Modern	Polytechnics
e.g. Oxford	e.g. Manchester	e.g. Warwick	e.g. Luton
Suspicious Collaborators	Cautious Collaborators	Pragmatic	Entrepreneurial

Lancaster University

Plate Glass 'Italian Village'

Ranked 8th overall UK

ImaginationLancaster =3rd in UK for Art and Design Research

Physics 1st for research in the UK

In our view its essential to...

- Promote a more symbiotic, integrated relationship between teaching, research and engagement
- Remove the 'stigma' of working directly with companies
- Remove the research ivory tower

and competing business
departments in the same region
Business and design mix**

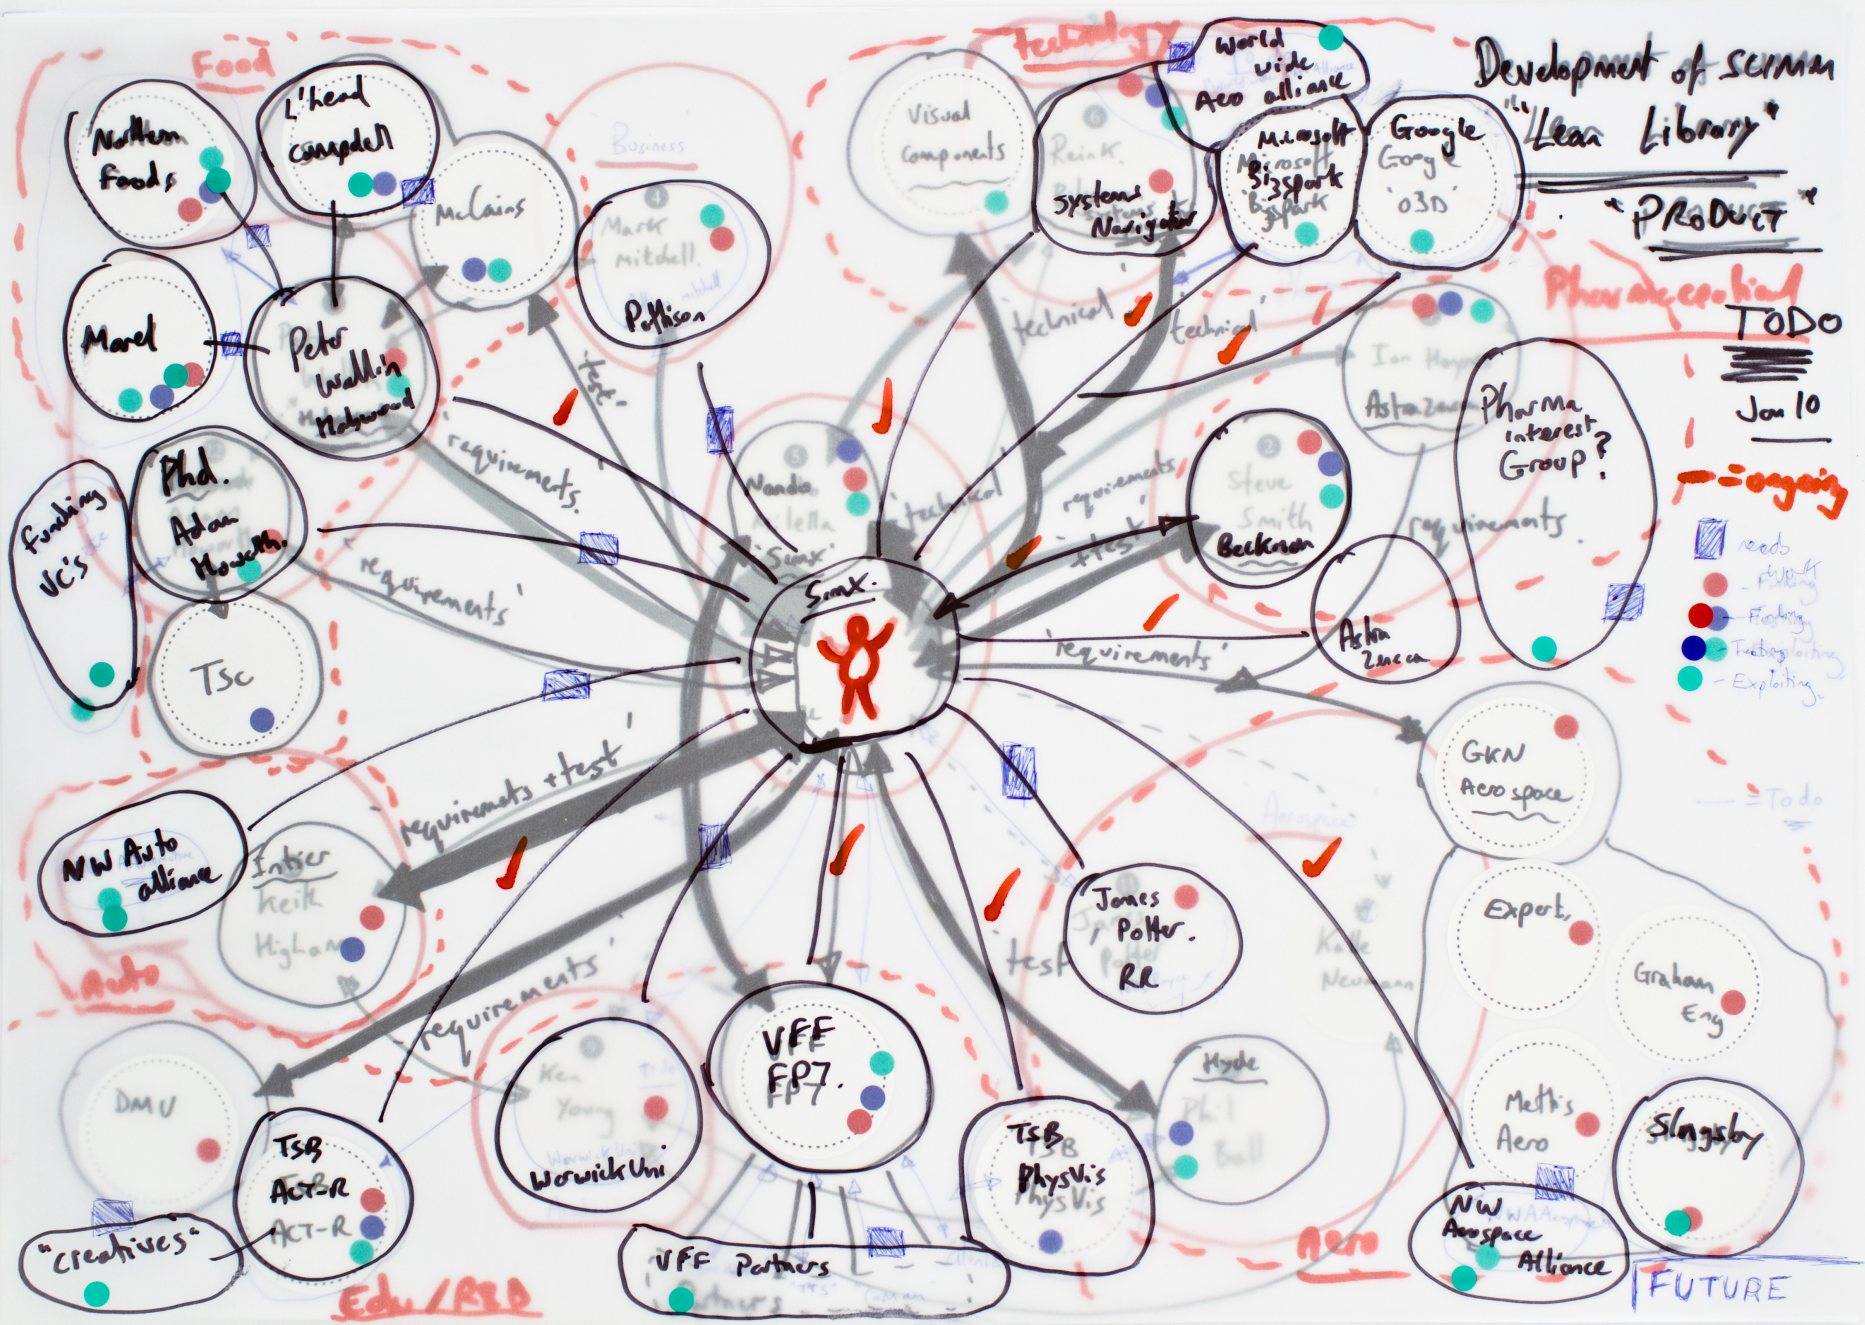

‘it will never work’

Aims of IDEAS collaboration

- new innovation and economic development models
- new approaches to knowledge exchange
- new skills for innovation and enterprises,
- new metrics for mapping and evaluation.

IDEAS funded events

IDEAS Key Achievements

- Academics delivering 'ERDF'
- Engagement professionals doing research
- Applying 'real-time' research
- Inter-University collaboration
- Innovative engagement research & practice

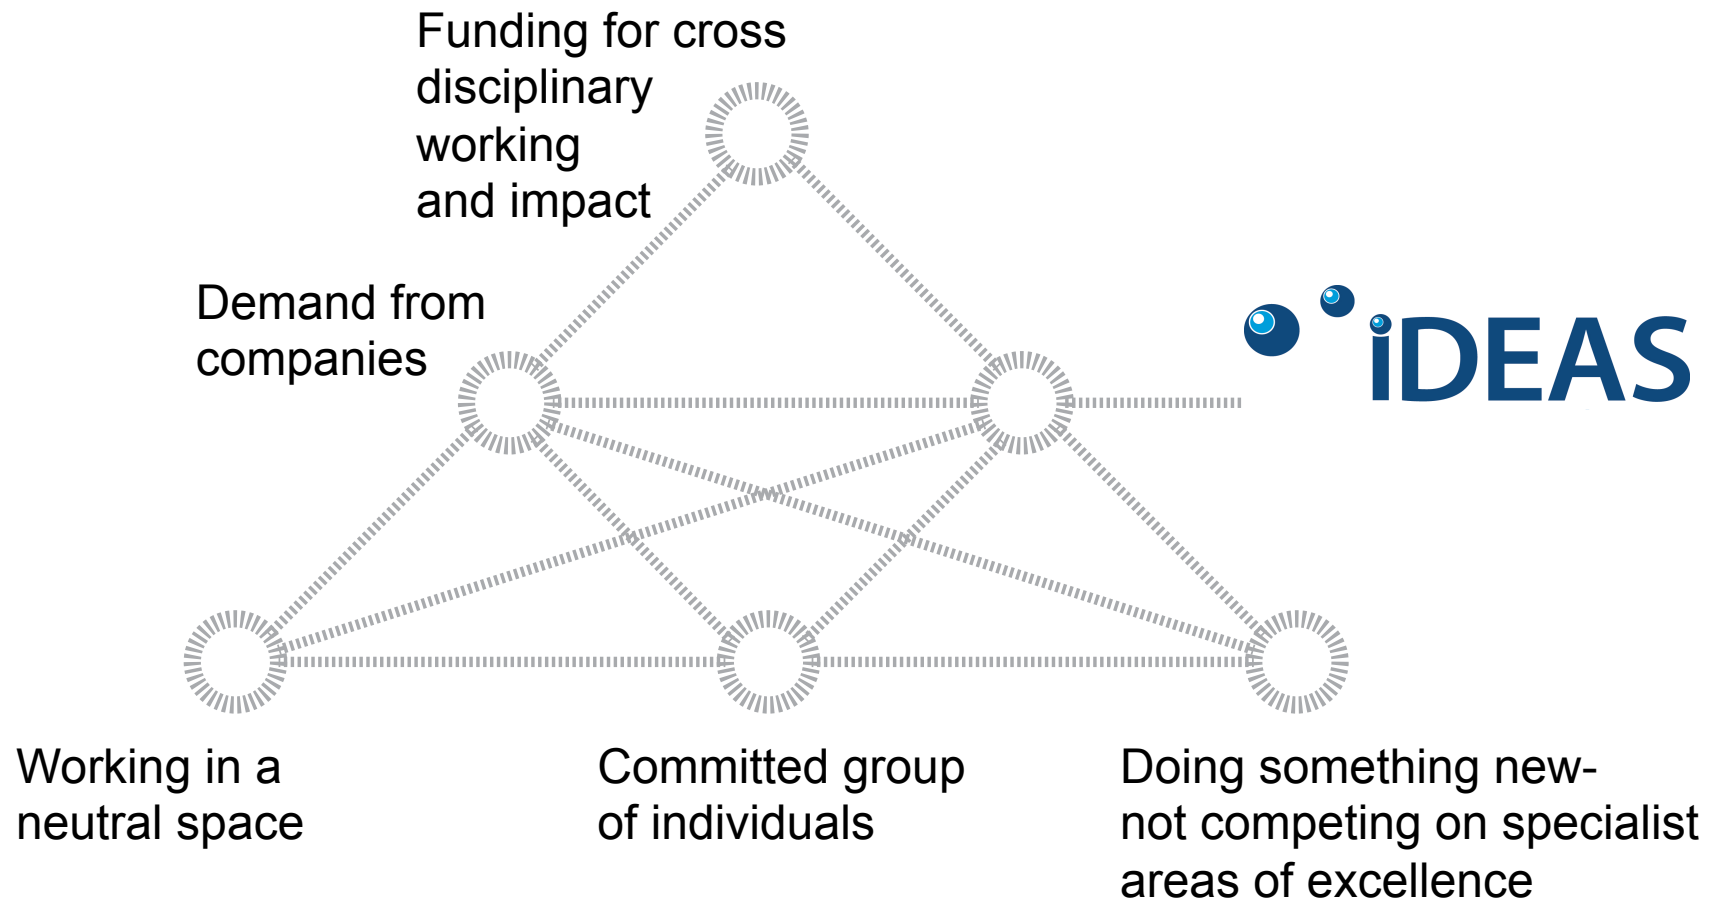

Why is it working

 **iDEAS**

Why is it working **NOT** and activity theory analysis (yet)

HighWire is a Doctoral
Training Centre at
Lancaster University.

Innovation with industry
in mind through
research which crosses
computing, design and
management.

Innovation for the Digital Economy
An EPSRC Doctoral Training Centre

Scale and Scope of HighWire

- Total EPSRC support of £6,000,000
- Additional industrial support over £1.6m

— What this means

- We can offer up to 10 studentships for 5 years
- Enhanced stipend for students
- Additional funding for state-of-the-art equipment, travel, placements and exchange

HighWire

Creating innovative people for radical change

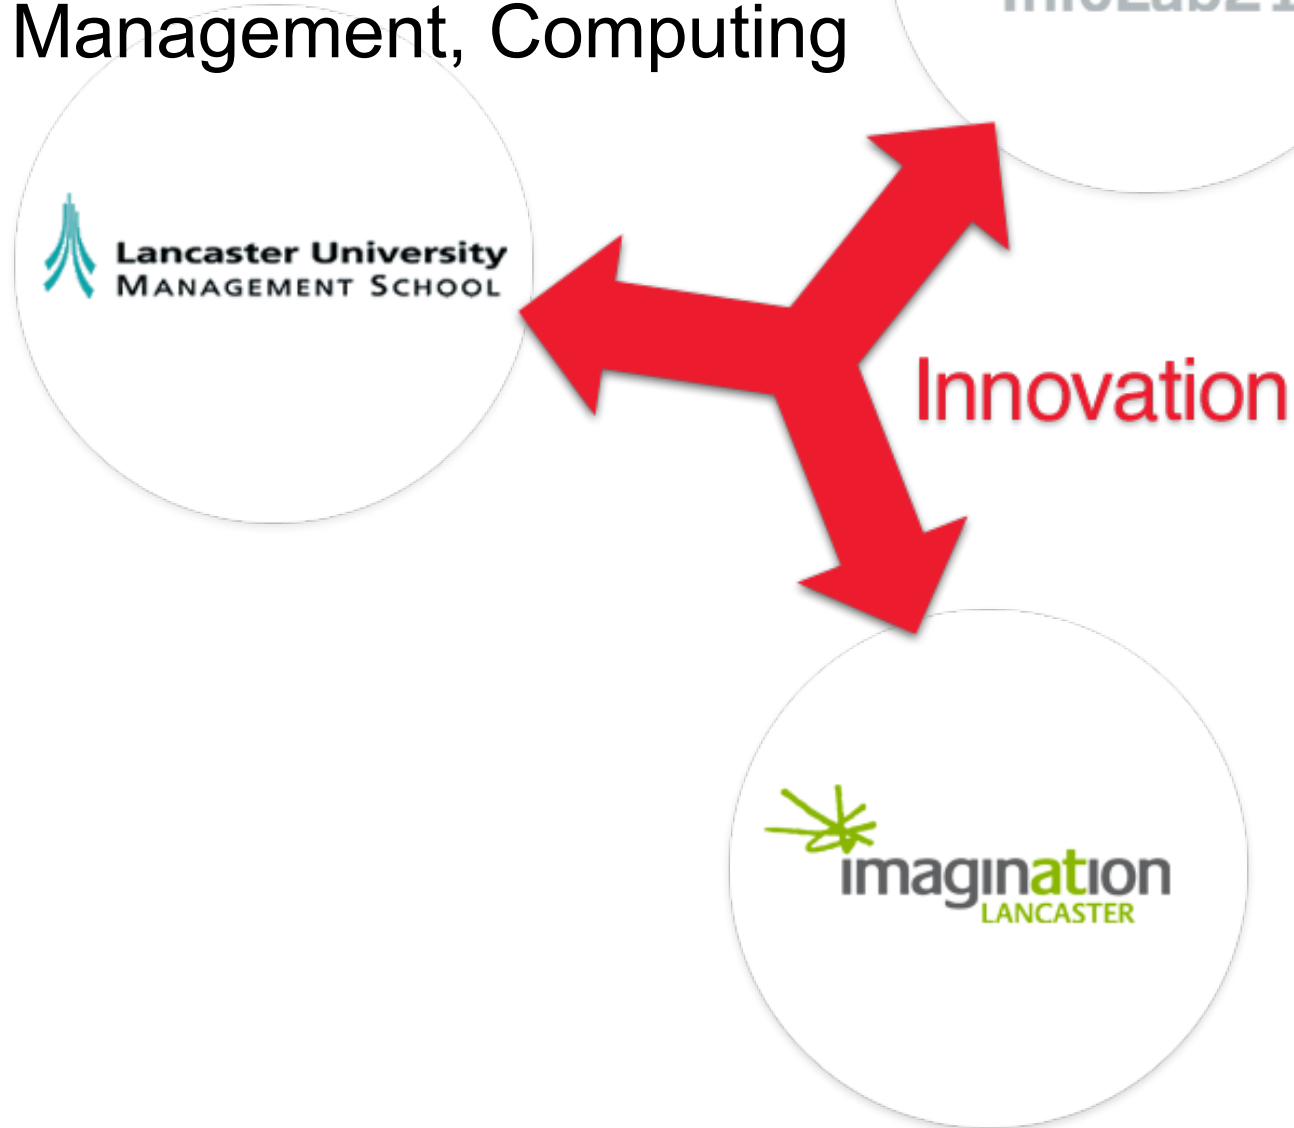

- A **post-disciplinary** approach
- **Innovation** key to curriculum and ethos
- Using Innovative places

In the digital economy

- From the **laboratory to the marketplace**
- **More generally about impact, not just new ideas**
- Strong user-led approach

The Constituent Parts

Design, Management, Computing

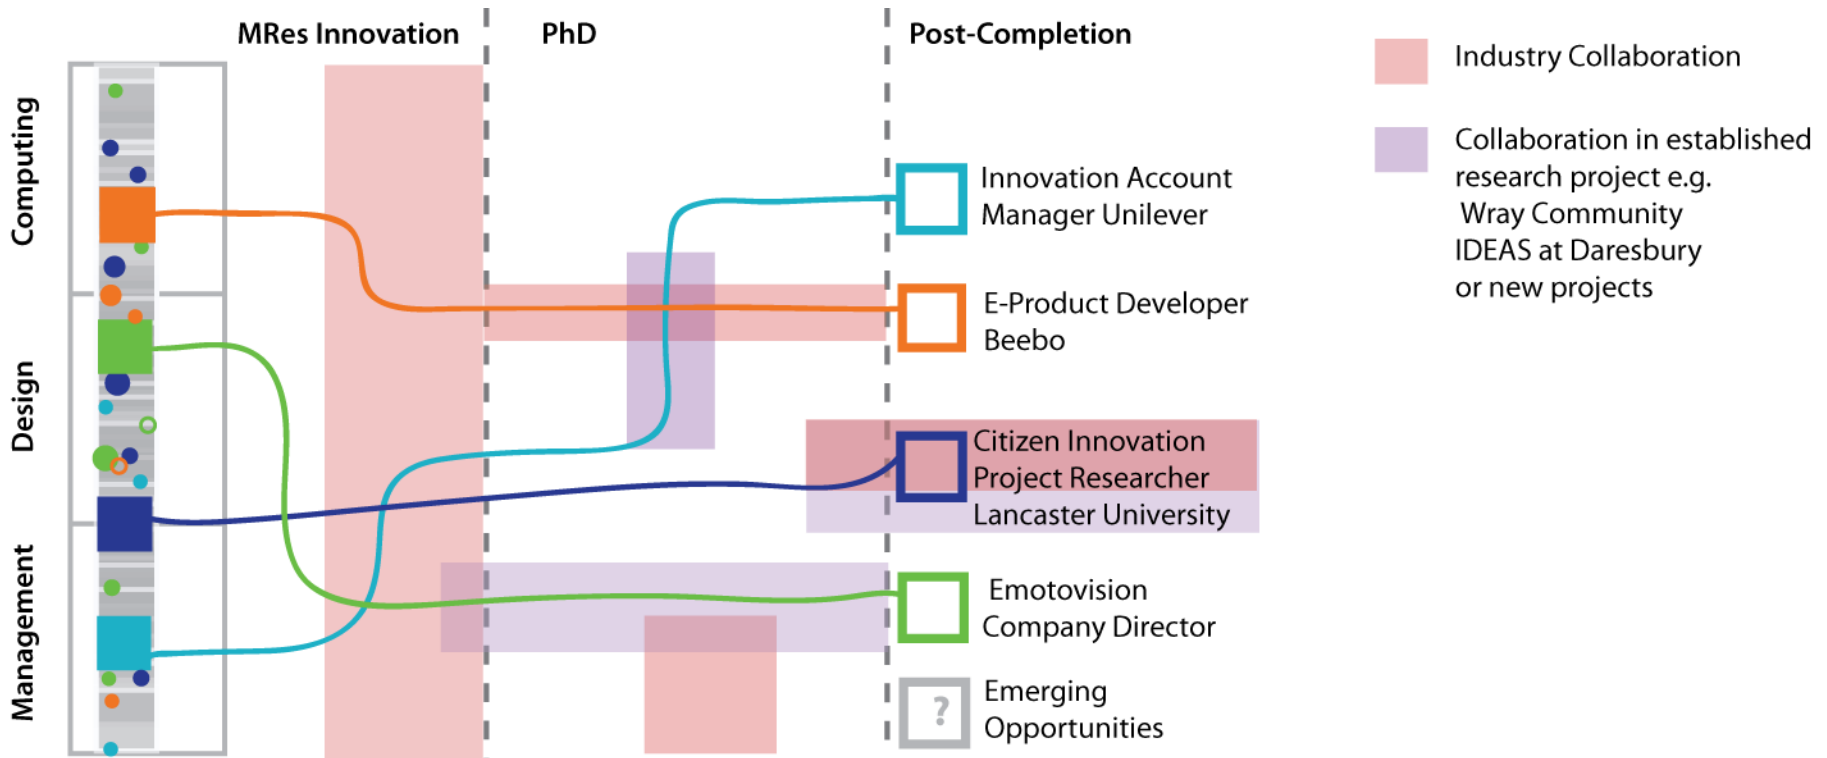

Overview of the Programme

- a new style of 4-year PhD programme designed to produce “the next generation of scientists”... or designers... or knowledge workers... or entrepreneurs...
- Year one MRes (in Digital Innovation) designed to develop cross-disciplinary skills

Potential Student Development

The first (and current) HighWire Cohort

Preparing for impact
MRes in Innovation –

Microsoft grand challenge

Content Creation in a Connected World

26th March 2010

An abstract graphic featuring a central orange circle with a black dot, from which several thick, curved lines in blue, green, and red emanate. These lines connect to various overlapping circles in light blue, light green, and pink, creating a network-like structure. The text "Major project workshop" is positioned at the top, and "BBC Workshop, research, teaching and engagement combined" is written in a large, bold, black font across the middle and right side of the graphic.

Major project workshop
BBC Workshop,
research,
teaching and
engagement
combined

Commercial In Confidence

Participants

Student Designed Events

Major Masters Project

- Work in groups
- Working with companies
- Research lab – resources bought in by champions for each project
- Working with Tinker IT, BBC, Mott McDonald ...

Tinker IT Students designed KT event

High
Wire

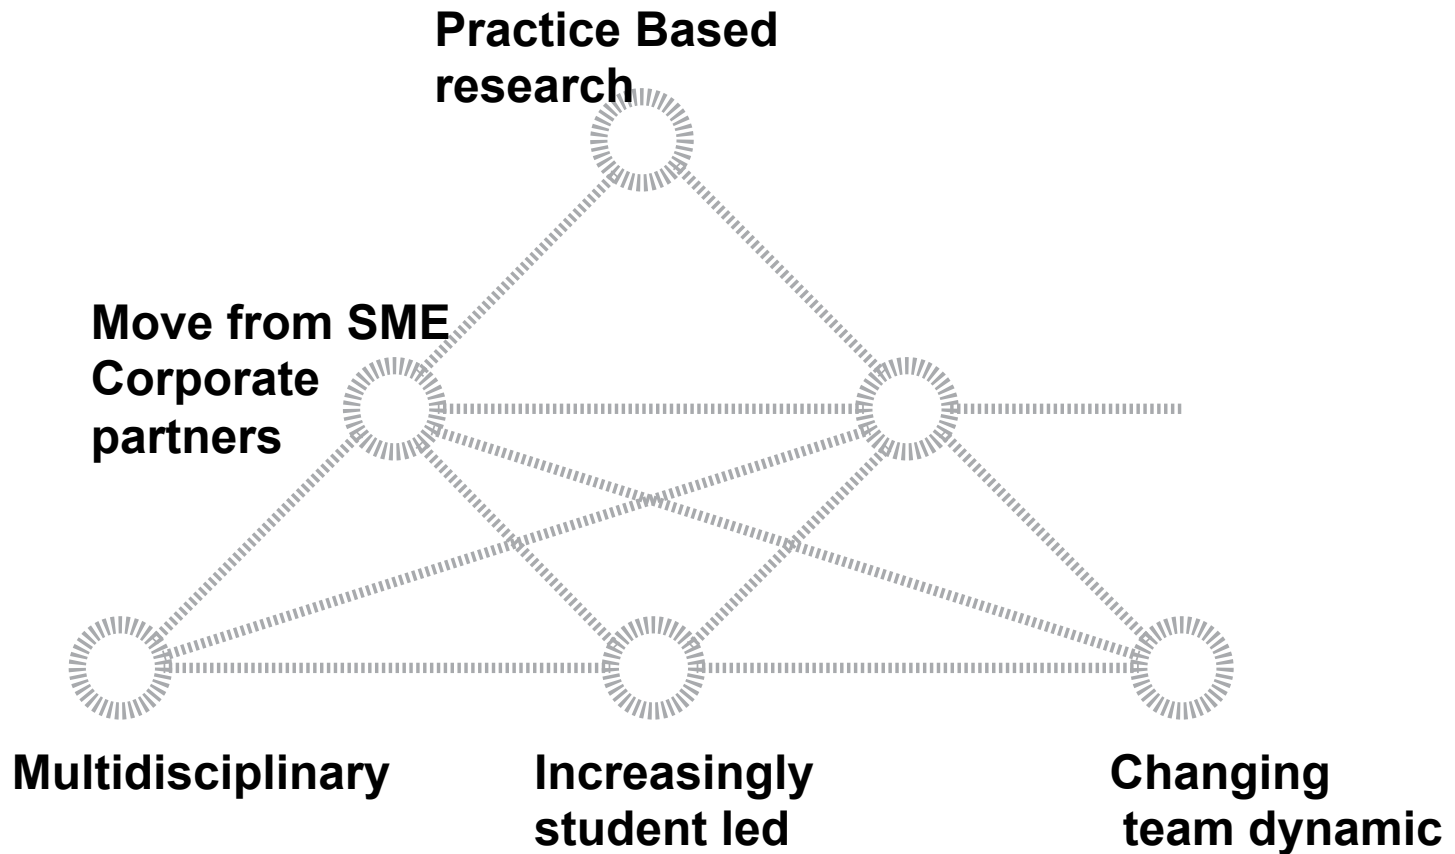

Innovation for the Digital Economy
An EPSRC Doctoral Training Centre

PhD next step...

- Clusters of topics
- Supervision across two of the three core disciplines
(computing design Management)

Emerging in HighWire

Growing a new breed

- New PhD
- New academic
- New engagement professional
- New models of value for research and engagement

Thank you
