

At Saja Designs, we care.

After all, your health is our health too. Established in 2048, Saja Designs was founded with one vision - to encapsulate the vision of the a perfect future, and to turn these ideas into reality.

Hearing the community's cries for an easier way to maintain a healthier lifestyle, we successfully created our first working prototype, the Saja Designs Sugar Neutraliser.

Our device took the world by storm; winning various design and invention awards, but most importantly, we are proud that we were blessed with the opportunity to give back to our communities - we have each one of you to thank for that.

However, our journey does not stop there. We want to help you, your families and friends, and subsequently, our own family and friends too, towards a smoother, healthier path in life.

“

The Sugar Neutraliser changed my life! Now I can drink all the sweet iced tea I want, without any worries.

Cheryl Tan Xue Rou, Age 25

”

“

Amazing. Life transforming. It's so convenient - few minutes in the Sugar Neutraliser and I can eat sugar-free meals any place, any time.

Aaron Koh Boon Winn, Age 57

”

“

Now I can enjoy my grandkids' birthday cakes as if I was a 10 year old. With the Saja Designs Sugar Neutraliser, I can enjoy the little things.

Simon Reuben Aloysius, Age 84

”

“

I can finally eat all the chocolate I want! I hope Saja Designs comes up with more world changing appliances like this one!

Joshua Tan Meng Ter, Age 61

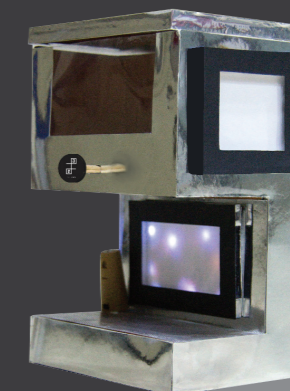

”

“

The Saja Designs Sugar Neutraliser has made so much more easier. Even though I have diabetes, I don't need to worry as much as I used to. The Sugar Neutraliser even reminds me if I need to use my insulin!

Kelvin Khishan Paramasivam, Age 43

”

Saja Designs Sugar Neutraliser

Sugar is delicious, but detrimental.

A survey by the World Health Organisation states that 422 million adults suffer diabetes as of 2014, and the numbers continuously increase each year.

In a world where innutritious, sugar laden consumables dominate the market, our product aims to think out of the box - instead of failing time and time again to eliminate sugary products from a consumer's pantry, why not work towards a solution that does not depend on the willpower of an individual to resist the temptation of sugary products?

Crafted by the mind of visionaries, the Saja Designs Sugar Neutraliser strives to build a community where health, flavour and convenience are synonymous and exist hand in hand. Here, we believe that you can enjoy life and food to the fullest; you don't need to leave behind indulgent delights to maintain your health, nor do you have to sacrifice your health to enjoy your favourite treats.

Live life to the fullest, and to the sweetest.

With Laser Technology, the Sugar Neutraliser emits intense, quick, pulses of light to break down the molecular bonds in the sugar, removing the sugar contents and neutralising the foods or drink without changing the taste or altering its temperature.

Conducive for Health
With the ever increasing cases of diabetes, obesity, heart attacks and other illnesses or diseases, our product strengthens the foundation for a healthier and more active community.

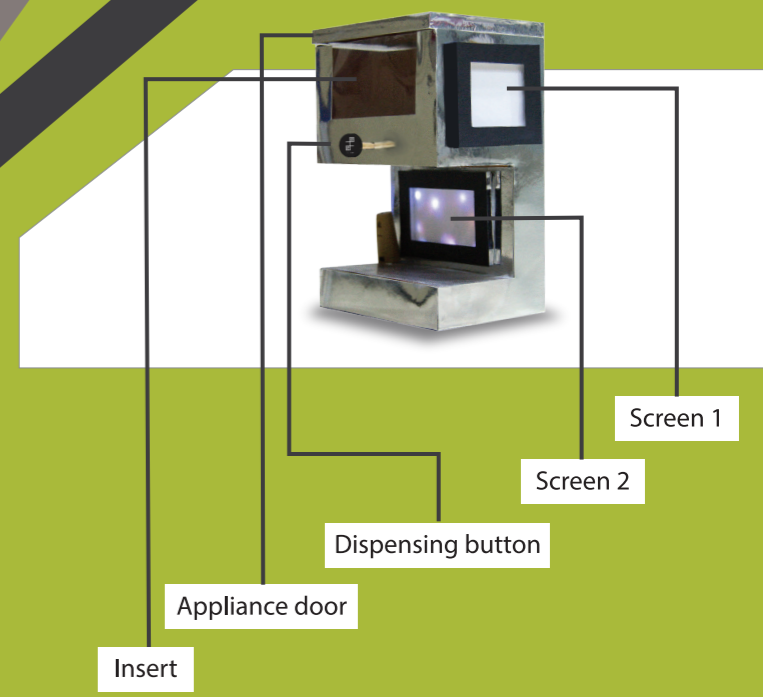

With the fingerprint scanner, this appliance scans one's blood sugar levels and presents one's calorie intake, recommended sugar level, etc directly on the screen of the Sugar Neutraliser, or through the Saja Designs app. They both also display the caloric intake and nutritional values of the consumables.

Convenient
With the slider insert and the container insert, Saja Designs Sugar Neutraliser keeps in mind whether you need to be sugar free at home, or on the go.

The Sugar Neutraliser has two different inserts to help ease one's convenience. In the case where one wishes to store the food or drink in the machine and only dispense it when needed, the slider can be utilized; if they wish to store it somewhere else, eat it immediately or use it as take out, the container insert will suit this endeavor.

Suitable for all ages
The strive for good health doesn't depend on age. Thus, it doesn't matter if you are old or young, or if you are already healthy or working towards it, the Sugar Neutraliser helps ease you in your journey, aiding you every step of the way.

How to use

1. Plug the Sugar Neutraliser to a power source. Press the ON button on screen 1 to turn the appliance on.
2. Place your thumbprint on the scanner on screen 1. Your health information and recommended sugar level will be shown on screen 1.
3. Put in your chosen insert, and put your food or drink onto/ into the insert.
4. The type of food/ drink will be scanned by the machine and it's nutritional content and relevant information will be shown on screen 2.
5. Select the "Neutralise" option on screen 2.
6. When done, a "beep" will sound and screen 1 will display that the process has been completed.
7. Leave your consumable for dispensing, or grab your consumable out for take away. It is sugar free and ready for consumption.
